PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 6+ years building scalable, high-performance web and mobile products across fintech, insurance, e-commerce, and AI. Deep expertise in React, Next.js, TypeScript, and Node.js, with a track record of shipping production systems at MassMutual, Verizon (via GlobalLogic), and a Google engagement at TCS — including an agentic AI product taken solo from greenfield to a deployed MVP using Claude (Anthropic). Open to senior remote roles with US/UK companies (USD).

CORE SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, Material UI
Backend	Node.js, Express, NestJS, REST & GraphQL, Java (Spring Boot), WebSockets, Kafka
AI / ML	Agentic AI, Claude (Anthropic), LLM Integration, OpenAI API, LangChain, Prompt Engineering, Python
Databases	MongoDB, PostgreSQL, MySQL, Firestore, DynamoDB, Elasticsearch
Cloud & DevOps	AWS, GCP, Azure, Docker, GitHub Actions, Jenkins, GitLab CI/CD, Vercel
Mobile	Flutter, React Native
Testing & Tools	Jest, TDD, Cypress, Playwright, React Testing Library, Postman, Swagger/OpenAPI, Figma

PROFESSIONAL EXPERIENCE

Senior Software Engineer Nov 2025 – Present

MassMutual (GBS) · Hyderabad, India

- Took a new initiative from greenfield setup to a deployed MVP, owning 100% of the full-stack build — frontend, backend, and deployment — while integrating Claude (Anthropic) to power agentic, autonomous workflows within the product.
- Engineered secure, scalable financial and insurance platforms with React.js, Next.js, TypeScript, and Node.js (SSR), integrated with Java microservices and Elasticsearch.
- Improved page load time by 30% through code refactoring, caching, and lazy-loading strategies.
- Designed and integrated secure payment gateways and multi-step order-management workflows, prioritizing data integrity and regulatory compliance.
- Built CI/CD pipelines for Canary and non-prod deployments, cutting release time by 40%.

Senior Software Engineer Jan 2025 – Aug 2025

GlobalLogic (Verizon) · Hyderabad, India

- Engineered micro-frontend modules (cart, checkout, product discovery) for a high-traffic Verizon e-commerce platform using React.js, Next.js, TypeScript, and Node.js with SSR, integrated with Java microservices.
- Modernized legacy storefront components, improving responsiveness and Core Web Vitals through code-splitting, caching, and lazy-loading.
- Drove defect triage across the e-commerce squad, reducing production bug resolution time by 25%.
- Designed secure payment gateway integrations and multi-step order-management flows for the checkout experience.
- Introduced automated CI/CD pipelines for Canary and non-prod environments, shortening release cycles by 40%.

Software Engineer

Oct 2021 – Nov 2024

Tata Consultancy Services (TCS) · Hyderabad, India

- Developed reusable UI component libraries in React.js and integrated high-traffic REST APIs.
- Increased automated test coverage to 85%+ using TDD (Jest) and documented APIs with Swagger/OpenAPI.
- Delivered scalable, production-grade web applications for Google under a client engagement, collaborating directly with Google stakeholders on requirements, code reviews, and delivery timelines.
- Mentored junior developers on best practices in UI development and API integration.

React.js TypeScript REST APIs Jest TDD Swagger Google Cloud

Software Engineer

Apr 2020 – Sep 2021

Aguila IT Consulting · Hyderabad, India

- Delivered single-page and full-stack applications using the MERN stack.
- Built secure backend modules for authentication and role-based access control.
- Optimized database queries and API design, improving response times by 20%.

React.js Node.js MongoDB Express.js MERN Stack JWT Auth

SELECTED PROJECTS

FinPlan — Financial Transaction Platform.

Built a full-stack financial transaction management platform from the ground up — robust backend logic and an intuitive frontend to streamline complex, compliance-sensitive workflows. *React.js, Node.js, MongoDB.*

SoloK — Retirement Fund Management.

Developed a full-stack Solo 401(k) retirement-fund administration application from scratch, focused on secure, efficient, and auditable fund operations. *NestJS, PostgreSQL, React.*

Starplayers — Fantasy Sports App.

Cross-platform fantasy sports application; designed GraphQL APIs and optimized response times for real-time scoring and leaderboards. *Flutter, Node.js, MongoDB, GraphQL.*

ORN-ai — AI EdTech Platform.

AI-driven EdTech platform with a React/Node GraphQL backend powering learner performance tracking and reporting. *React.js, Node.js, GraphQL.*

EDUCATION

Master of Computer Applications (MCA)

Acharya Nagarjuna University · 2019 – 2021

B.Sc. — Computer Science

S.V.R.M College (Acharya Nagarjuna University) · 2016 – 2019 ·
7.3 CGPA

CERTIFICATIONS

Professional Cloud Architect — Google Cloud

Professional Cloud Developer — Google Cloud

Professional Data Engineer — Microsoft Azure

Prompt Engineering in Generative AI — Udemy

Full-Stack Development (MERN) — Udemy
